

3-4-2

Proven Weed Control
with
Weed-no-More®
(2,4-D Quick Penetrating Butyl Ester)
WHY WEED-NO-MORE "80" PREFERRED
Green Cross pioneered the introduction of the butyl ester of 2,4-D to Canada. Six years of tests and we have now **PROVED** that this special formulation gives consistently high ratings for quick weed kill, safety and efficiency. It penetrates the plant so quickly that it

fail a few minutes after application will not wash it off or affect its efficiency. That's why today Weed-More® 80" is recognized as the leading Canadian Weed Killer.

MORE ACID GIVES MORE ACRES PER GALLON

Weed-No-More® "80" has a much higher (80% 2,4-D acid content and less is required per gallon spray. At 3 oz. acid strength, one 5-gallon can is enough to spray 133 acres, while 5 gallons of chem-

containing 64 oz. acid covers only 106 acres and a 66
acid brand only 93 acres.

Weed-No-More "80" therefore gives MORE ACRES
PER GALLON.

PRICE FURTHER REDUCED

The greater use and long technical experience
Green Cross have now made it possible to reduce
cost of Weed-No-More "80" to the lowest price possi-
ble without sacrificing quality and results. This year
Weed-No-More "80" gives the greatest value ever.

Weed-No-More "80" 1 Gal. **\$6.95**

Empress of
Australia Replaces
Empress of Canada

Britain Hustles Coronation Preparations

Miss P. G. Holliman puts finishing touches on a small scale reproduction of Westminster Abbey which is part of a large model of the coronation pageant.

The sentry box in front of Buckingham Palace gets a new coat of paint for the occasion. The stern guardians did not turn to watch.

The Rose of England will bloom along the coronation parade route. This huge display flower is being hung high enough for all to see on Regent St.

Standing room only. That is the way many will view the coronation. London lanes seen above are applications, some from as far away as Australia.

Hats in the air will be seen above London lampposts. Seen here is a white Household Cavalry helmet with a trailing crimson and white plume.

Fitting tents to Her Majesty will be the way many will view the coronation. London lanes seen above are applications, some from as far away as Australia.

PRIME MINISTER LOUIS S. ST. LAURENT, seated at right, and President Dwight D. Eisenhower, confer at the White House following Mr. St. Laurent's arrival in Washington for an official visit. Standing, left to right are: Hume Wrong, Canadian Ambassador to the U.S.; Hon. Lester B. Pearson, Minister for External Affairs; and John Foster Dulles, U.S. Secretary of State.

FORD'S NEW ASSEMBLY PLANT AT OAKVILLE. The first car has been turned out by this new Ford of Canada plant which moved into production only one year after the first steel girder was erected. The new building places Ford of Canada assembly operations in the heart of the Canadian market.

EMPERESS—On her first voyage to Canada under Canadian Pacific colors the majestic looking Empress of Australia makes her way up the St. Lawrence River to Montreal. The ship is the latest addition to the Empress fleet, replacing the Empress of Canada which burned in Liverpool, Eng., while undergoing repairs last January.

CLOSE!—Just to be sure, this judge uses a magnifying glass to check scores in the three-day shuffleboard competition at St. Petersburg, Fla. More than 200 players participated.

A TORNADO'S PATH OF DESTRUCTION—Main street in Hobart, N.H., presents a picture of devastation as damaged buildings and scattered debris litter the tornado-swept street after a passing squall cut a path through the tiny town. An estimated two-thirds of the homes and business places in the town were either damaged or destroyed, and scores of the 2,000 inhabitants injured.

DEADLY SPRAY—Specially equipped work trains of this type now are waging war on weeds and brush along some 10,000 miles of Canadian National Railway right-of-way across the country. The five-gun spray unit shoots a weed-killing chemical mixture—harmless to domestic animals and gains—over a 100-foot-wide swath.

THE BOOK CLOSING on a 41-year flying career and Londoners held their collective breaths as 60-year-old Christopher Tracey, the "Mad Major" of Britain's World War I aerial fleet, assumed his light plane under mist of London bridges. In a spectacular farewell gesture to flight, he zoomed under 15 Thames spans, amid dangerously low between old buildings in the heart of London and brought residents tumbling in awe from their homes to watch his 30-minute bid to "get off the dose." Above, reporters surround the major for the inevitable interview after his "swan song." Right.

GOD SAVE THE QUEEN—Seen above, in this scene from the film "Coronation Ceremony" is a preview of the crowning of Queen Elizabeth II. The Archbishop of Canterbury has just returned from the altar of London's Westminster Abbey, and is handing the Crown of St. Edward above the Queen's head. As he places it on her head the assembly will shout "God Save the Queen."

Take Them "Loose"

One of the worst faults any boxer has, says a top authority, is to make a "loose" fight. Unfortunately, this is one of the most common faults made by even the younger players. The idea is, if your hands and feet are loose, they will move more easily and you will be able to take more punishment. Then too, if your hands and feet are loose, they will move more easily and you will be able to take more punishment. Then too, if your hands and feet are loose, they will move more easily and you will be able to take more punishment.

Make sure you are not caught back ready for the attack will before the fight is over. The average player does everything else first and then thinks of the defense. The moment you use which side the ball is in, getting your right hand back and making you take it with back. If you do the you'll be able to stop the attack. The moment you use which side the ball is in, getting your right hand back and making you take it with back. If you do the you'll be able to stop the attack.

WEEKLY BIBLE COMMENT

PAUL'S EARLY LIFE AND BACKGROUND

The life of the Apostle Paul is a story of a man who was a Jew, a Roman citizen, and a Christian. He was born in Tarsus, a city in the province of Cilicia. He was a Pharisee, a member of the strictest sect of the Jewish religion. He was a Roman citizen, a privilege that gave him certain rights and privileges. He was a Christian, a follower of Jesus Christ. He was a man of many talents and many virtues. He was a man of many talents and many virtues.

Narcotic Addiction Study Planned For British Columbia

OTTAWA.—A research program designed to find improved ways of treating and preventing narcotic addiction is to be undertaken in British Columbia with the support of a federal health grant.

This was announced here by Hon. Paul Martin, minister of health, and Health and Welfare. The study, he said, would be a comprehensive one, involving the study of the problem of narcotic addiction in the province of British Columbia and the study of the problem of narcotic addiction in the province of British Columbia.

The plan involves organization of a research team to conduct a study of the problem of narcotic addiction in the province of British Columbia. The team will be made up of experts in the field of narcotic addiction, and will be headed by a senior official of the health department.

The study will be conducted in a number of ways. It will involve the study of the problem of narcotic addiction in the province of British Columbia, and the study of the problem of narcotic addiction in the province of British Columbia.

K-I, U.S. Navy's Latest Weapon

Underwater Marauders Are Targets Of New Subs

NEW LONDON, Conn.—It is said of modern warfare that for every weapon of offense, a defense must be created. In the air, speedy, fast-flying interceptors head off bomb-laden planes before they can reach their destinations. On land, small groups of soldiers—on occasion, even a single man—equipped with machine or light machine artillery can destroy an enemy's armor.

By the same token, atomic artillery shells used by a small gun crew can break up and eliminate an enemy's concentration of troops.

Now a similar device has been provided for the submarine—the K-I, already one of them, a prototype of which now has been built in U.S. shipyards and has been commissioned.

Dubbed the K-I ("K" for Killer), it is a normal-looking submarine except for the absence of several familiar deck protrusions such as guns and lifeboats.

What makes this one different from former subs, aside from its unusual, underwater breathing device, is the strange weapon that houses atomic energy.

What makes this one different from former subs, aside from its unusual, underwater breathing device, is the strange weapon that houses atomic energy.

One's instinct is to wonder why it launch lethal and intricate torpedoes that will "batter" on the sound of the enemy's submarine. The answer is that the approach near enough to shore to be detected by the enemy's radar. Several of these detection devices are now being used by the navy, and several of them can only be described as fantastic. They are designed to make contacts under worst possible conditions—without a human eye actually seeing the enemy.

Normally directed the creation of a submarine by the U.S. navy, resulting that it takes as many as three modern destroyers to sink one. And kill an enemy underwater boat, looked to its own subs for defense.

To this end, the sum of \$175,000.

Latent Wolf of the Sea—The K-I

1900 was spent modernizing its existing fleet. The work continued on the K-I, which was designed to carry powerful batteries to propel the craft underwater.

The next step was the K-I, on which, incidentally, despite superior speed, competition there is doubt. As one old submarine, World War I vintage, commented after being shown one of the modern subs:

"I don't know what other than we can come within a few miles of an enemy ship, but I don't know if we can do it."

"They were called torpedoes for a good reason," he laughed and continued, "There was no air—no wind, of course, and the hulls and overboard and so on."

Super-Jet Aircraft Of Future To Smash Windows, Hurt Ears

LONDON—A British flight expert said the super-jet planes of the future, on the way to the unroof house and shatter the human eardrum. This preview of things to come was given by A. H. Yates, senior lecturer in aerodynamics at the Royal College of Aeronautics, in a letter to the Times.

Yates said the super-jet "banger" will be a small plane which will take place between the so-called jet and the rocket. It will be "Whenever an aircraft flies at 1,000 to 1,200 miles an hour, depending on its height, it creates a wave of air which is thrown away from it as do the bow waves of a ship traveling down through water."

HEALTH

"Intestinal Fortitude" Said Needed In Dieting

Two million Canadians are overweight, and those two million will be the rest of the population, says a new book by Dr. Frank Crane, a physical medicine specialist.

"It is a fact," he writes, "that the ideal weight, you are about 10 per cent above the ideal weight, but the ideal weight is made for the ideal body."

"The ideal body is the ideal body," he says, "but the ideal body is the ideal body."

"The ideal body is the ideal body," he says, "but the ideal body is the ideal body."

Woman Sought Legal Aid Before Murder

CHARLESTON, W. Va.—Attorney J. H. Hargrave said he had been contacted by a woman who asked for legal aid in connection with an "important case." Hargrave said the conversation was the first of its kind.

"A murder case," he said. "What was the defendant?"

"Are you on your feet?" he asked. "I haven't killed my husband."

"What about the husband?" he asked. "He was killed."

"He was killed?" he asked. "He was killed."

"He was killed?" he asked. "He was killed."

"He was killed?" he asked. "He was killed."

"He was killed?" he asked. "He was killed."

New Drug With Flashing Light Cures Mentally Ill

CHICAGO—A new drug plus a flashing light are used in a new treatment to shock mentally ill mental patients back to health.

Nothing happens when the drug, semicarbamide, is given, but when a room light is flashed in the person's eyes, he goes into an epileptic convulsion. This convulsion acts as a shock to the brain, and the patient is brought back to health.

A team of scientists from the University of Illinois college of medicine and Montrose state hospital, Madison, Ill., described the treatment to the Federation of American Societies for Experimental Medicine.

Dr. Carl C. Pridgen, of the university's pharmacology department, said the treatment is a new method of treating mental illness.

Semicarbamide is a convulsant chemical, and is related to the new "shock" drug, semicarbamide, which is used to treat mental illness.

New York Going Rural

Foresees Streets Covered With Grass, Flowers Within 25 Years

NEW YORK—New York City was given twenty-five more years by Frank Lloyd Wright, who predicted that thoroughfare grass would grow in the streets and flowers bloom on the sidewalks.

The prediction, followed by a New York City architect, president of the National Institute of Arts and Letters, that the 64-year-old architect had been selected by the Institute's 250 members to receive its gold medal award for his work in 1927.

When Mr. Wright had dropped into the city, he had been in New York for the first time. He had been in New York for the first time.

He had been in New York for the first time. He had been in New York for the first time.

He had been in New York for the first time. He had been in New York for the first time.

Take the TRIANGLE TOUR

See the PACIFIC COAST

An absorbing holiday route... through the Canadian Rockies to

JASPER
MOUNT ROSS
SKEENA RIVER
PRINCE RUPERT
VANCOUVER
FRASER RIVER

The scenic attractions of two great provinces make the Triangle Tour an impressive vacation adventure. On or after another they pass in parade. You watch them by sea and rail. Vantage points are choice... the big wide windows of Canadian National coach or sleeper... and the spacious decks... cruising through the sheltered Inside Passage between Prince Rupert and Vancouver. The mainland is always in view along this placid water route. Rastell... relaxing... and everywhere the kind of service you want.

Make your travel arrangements easily and conveniently... through your nearest C.N. agent. He'll help you with every detail.

CANADIAN NATIONAL
THE RAILWAY TO EVERYWHERE IN CANADA
